

ALCOM'S **Crossover / Hybrid Series:**

Sets New Benchmark in the Snowmobile Trailer Market

We developed the original.
Now we've taken it to the next level.

Gearing up for the 2018-2019 snow season, ALCOM has introduced a number of new features and options that improve the look and performance of our Crossover and Hybrid model lines. Highlights include:

REVISED FRONT ACCESS DOOR - Combining custom extrusions, an improved latching mechanism, and the industry's largest front door opening (32"x70"), loading and unloading your sleds in a Crossover or Hybrid has never been easier. Keep your machines and gear protected from the winter elements, and spend more time on the snow.

3-PIECE LOOP STEP -

We've overhauled our loop step for 2019, providing more clearance for larger boots and a non-skid surface that helps ensure you enter and exit your trailer safely, every time you use it.

NEW FEATURES AND UPGRADES -

Aluminum hinges and locking bars, an all-new LED lighting package, and galvanized axle and wheel upgrades can be mixed-and-matched to tailor your Crossover or Hybrid trailer to meet specific winter towing requirements. Battle the winter elements with confidence...and look good while doing it.
